PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to UBE3C immobilized on solid support. The epitope recognized by A304-123A-T maps to a region between residue 725 to 775 of human Ubiquitin Protein Ligase E3C using the numbering given in entry NP_055486.2 (GeneID 9690). Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. Use rabbit anti-UBE3C antibody A304-122A.
