PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to SOGA1/C20orf117 immobilized on solid support. The epitope recognized by A304-911A-T maps to a region between residue 1373 to 1423 of human Uncharacterized protein KIAA0889 using the numbering given in entry O94964.2 (GeneID 140710). Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. A304-911A has not performed satisfactorily when used for WB of SOGA1/C20orf117 in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of SOGA1/C20orf117.
Immunoprecipitation	2 - 10 µg/mg lysate
