PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to CMSS1/C3orf26 immobilized on solid support. The epitope recognized by A305-154A-T maps to a region between residue 75 to 125 of human Uncharacterized protein C3orf26 using the numbering given in entry Q9BQ75.2 (GeneID 84319). Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. A305-154A has not performed satisfactorily when used for WB of CMSS1 in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of CMSS1.
Immunoprecipitation	2 - 10 µg/mg lysate
