PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to MYBBP1A immobilized on solid support. The epitope recognized by A301-327A maps to a region between residue 450 and 500 of human MYB binding protein (P160) 1a using the numbering given in entry NP_055335.1 (GeneID 10514). Immunoglobulin concentration was determined using Beer's Law where 1mg/mL IgG has an A280 of 1.4.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Immunoprecipitation	6 µg/mg lysate
Immunohistochemistry	1:500 - 1:2000. Epitope retrieval with citrate buffer pH 6.0 is recommended for FFPE tissue sections.
