PRODUCTION PROCEDURES Antibody was affinity purified using an epitope specific to ANKZF1 immobilized on solid support.

The epitope recognized by A301-387A-T maps to a region between residue 676 and 726 of human ankyrin repeat and zinc finger domain containing 1 using the numbering given in entry NP_060559.2 (GeneID 55139).

Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. Use rabbit anti-ANKZF1 antibody A301-386A.
Immunoprecipitation	2 - 5 µg/mg lysate
