PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to SLM-2 immobilized on solid support. The epitope recognized by A303-191A-T maps to a region between residue 1 and 50 of human Sam68-like Mammalian Protein 2 using the numbering given in entry NP_006549.1 (GeneID 10656). Immunoglobulin concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. A303-191A has not performed satisfactorily when used for WB of SLM-2 in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of SLM-2.
Immunoprecipitation	2 - 10 µg/mg lysate
