PRODUCTION PROCEDURES	Antibody was affinity purified using an epitope specific to DPP9/DPRP2 immobilized on solid support. The epitope recognized by A304-851A-T maps to a region between residue 775 to 825 of human Dipeptidyl peptidase 9 using the numbering given in entry Q86TI2.3 (GeneID 91039). Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG.
APPLICATIONS	Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

Western Blot	Not recommended. A304-851A has not performed satisfactorily when used for WB of DPP9/DPRP2 in crude preparations (e.g. whole cell lysate). This antibody can be used for WB of enriched (e.g. immunoprecipitated) sources of DPP9/DPRP2.
Immunoprecipitation	2 - 10 µg/mg lysate
